

PERSONALISED PUBLIC SERVICES IN SUPPORT OF THE IMPLEMENTATION OF THE CAP

SCAR-AKIS 10<sup>th</sup> Meeting  
Brussels 31/10/2018

**“Digital solutions enabling the delivery of  
added value advisory services –  
The RECAP H2020 project ”**

**Dimitrios Petalios**

**R e i n f o r c i n g C A P**

The project has received funding from the European Union's Horizon 2020 Research and Innovation Programme under Grant Agreement No. 693171.

# Challenges in CAP monitoring

1

Large number of rules

2

Complex measures due to the level of detail of the applicable rules.

3

Control procedures are reflected in high costs.

4

Checking for all rules across the entire farm can be time-consuming

5

Shift from a control to a monitoring approach

6

Use of new technology and multiple data sources

# RECAP as a solution

- We can combine **infrastructure & knowledge** & make best use of the **satellite data** available for the public authorities and the whole agricultural ecosystem.
- We can **break down** this very complex legislation into practical everyday **personalized guidance for farmers**.
- Public authorities' procedures can be more **transparent** and more **efficient**.

# RECAP – user driven solutions

1

Farmers

2

Agr. Consultants &  
Extension services

3

Paying Agencies

User requirements  
identification

May

Co-production phase with Paying  
agencies & AgrC & Ext Services

Sep  
2017

1st Release of the  
RECAP Platform

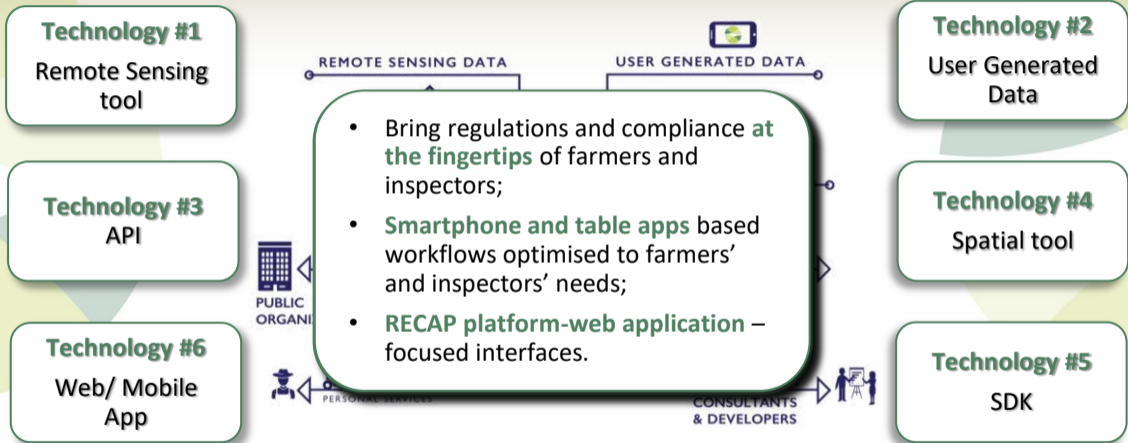

Mar  
2017

Co-production phase  
with Farmers

Feb  
2018

Co-production phase SDK with  
AgrC & Ext Services & Developers

# RECAP- An open concept

# RECAP- An overview

The screenshot displays the RECAP web application interface. On the left is a dark sidebar menu with the RECAP logo at the top and a list of navigation items: Farm Profile, CC Rules - Checklist, My Documents, Roles, Reminders, Maps, BPS History, E-learning, Contact PA, and Contact Inspector. A secondary menu is visible behind it, listing: Inspectors, Farmers, Help Materials, Messages, and Remote Sensing Results. The main content area has a green header with the RECAP logo, the text 'Remote Sensing Results', and a user profile for 'Paying Agency Paying Agency ES'. Below the header is a white box titled 'Get bounding box by BPS ID' with an input field for 'Enter BPS ID'. The central part of the interface is a map showing a satellite view of a rural landscape with a red bounding box highlighting a specific area. A search bar at the top left of the map says 'Search and zoomable to place'. The bottom right corner of the interface contains the text 'Copyright © ReCap 2017'.

# What have we achieved?

## Paying Agencies

More **targeted** on-field inspections

Better **control system** based on **satellite images & registry information**

Reduction of **costly & time-consuming** procedures

## Farmers

**Personalised** guidance

**Active** participation

Access to **up-to-date** information

Reduction of **administrative burdens**

**Closer relationship** with PA

More **transparent** execution controls

## Agr. Consultants & Extension Services

**Improved** advisory services

Supporting **Farmers' compliance**

Data **availability, accessibility & re-use**

Development of services under **an open approach**

Pilot countries

■ Cross Compliance rules

■ Organic Certification

# RECAP in action!

**UK**  
Farmers: 150  
Agr. Consultants: 50  
Inspections: 50

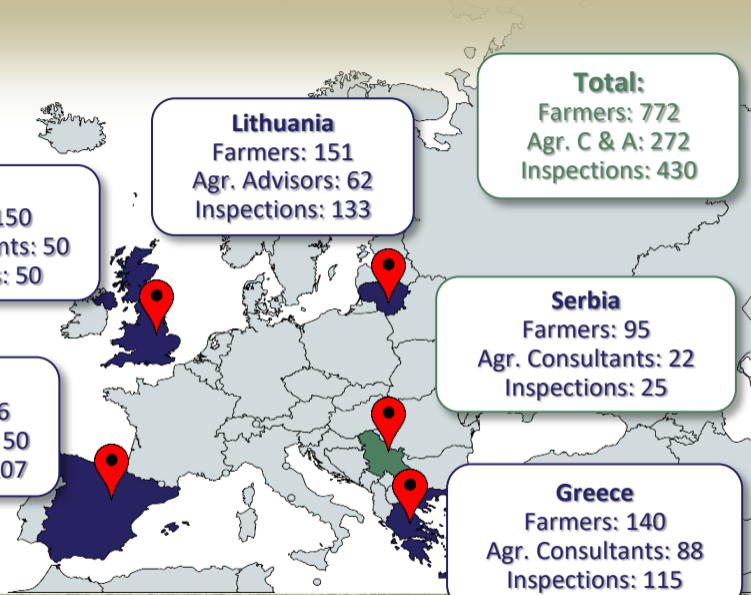

**Spain**  
Farmers: 236  
Agr. Advisors: 50  
Inspections: 107

**Lithuania**  
Farmers: 151  
Agr. Advisors: 62  
Inspections: 133

**Serbia**  
Farmers: 95  
Agr. Consultants: 22  
Inspections: 25

**Greece**  
Farmers: 140  
Agr. Consultants: 88  
Inspections: 115

**Total:**  
Farmers: 772  
Agr. C & A: 272  
Inspections: 430

# What are the users saying...

## Farmers:

- Precise, personalized information & simple advice on CC & greening rules applying to his/her parcels **using RECAP platform**

- Maps/RS component – helpful to correct admin mistakes

**Malta (INTIA):**  
 “Approximately 40% of time on the spot checks is saved by using the platform”  
 Notifications with concrete/specific messages - helpful to ensure compliance

## Gintare (LAAS):

“79% of the farmers tested the RECAP are willing to use it.”

## Advisors:

**Ausrine (NMA):**  
 Inform farmers to correct mistakes in their claims, correct prob boards etc.  
 “around 25% reduction of inspection costs”

- Enhanced communication with farmers – sending alerts/notifications using the platform

**Maja (INO):**  
 “4 out of 5 pilot users are willing to adopt RECAP”

**Kostas (OPEKEPE):**  
 Value advisory services use of SDK

“Pilot farmers positive to use RECAP mobile app. Inspectors are fond of using the platform on a daily basis”

# What have we learnt?

## **Farmers – Focus on producing**

Holistic approach within the policy framework  
Build/enhance digital skills

## **Advisors – Digital services**

Use of digital solutions  
Important role in building farmers digital skills

## **Integrated EU & national systems**

Centralized interconnected systems for public authorities  
Enhanced public e-services
