Left overs from
previous years

4 clusters (14 subclusters, 48 ideas)

AKIS & Digitalisation

Sustainable
Management of
Natural Resources

Value chains &
Bioeconomy

Other ideas

17th SOI meeting, 3 December 2020

Which of the four clusters do you find most important?

Posted to Session: Session III: Proposals for networking activities after 2020, in the context of the European CAP network

[Display Results](#)

In subcluster 2.4 (Water management), which topic do you find most important?

Posted to Session: Session III: Proposals for networking activities after 2020, in the context of the European CAP network

[Display Results](#)

Seminar

Turning forest innovation into practice

Workshop

Farm data for better agri-environmental performance

Focus Groups

1. Farm Sustainability Tools (FaST)
2. New ways to deal with fruit tree pests and diseases, while reducing or eliminating the use of pesticides
3. Water Management in the context of climate change:
 - Nature-Based Solutions for water management under climate change conditions
 - Prevention and remediation of water pollution caused by climate change including effects on natural and artificial water storages and distribution infrastructure.
 - Practices in small and large scale farms to deal with the effects of water abundance (rapid water showers, floods)

Thank you
