Long-term expected impacts

Impact 1 Climate neutrality and adaptation to climate change

Impact 2 Preservation and restoration of biodiversity and ecosystems

Impact 3 Sustainable and circular management of natural resources; tackling pollution; bioeconomy

Impact 4 Food and nutrition security for all from sustainable food systems from farm to fork

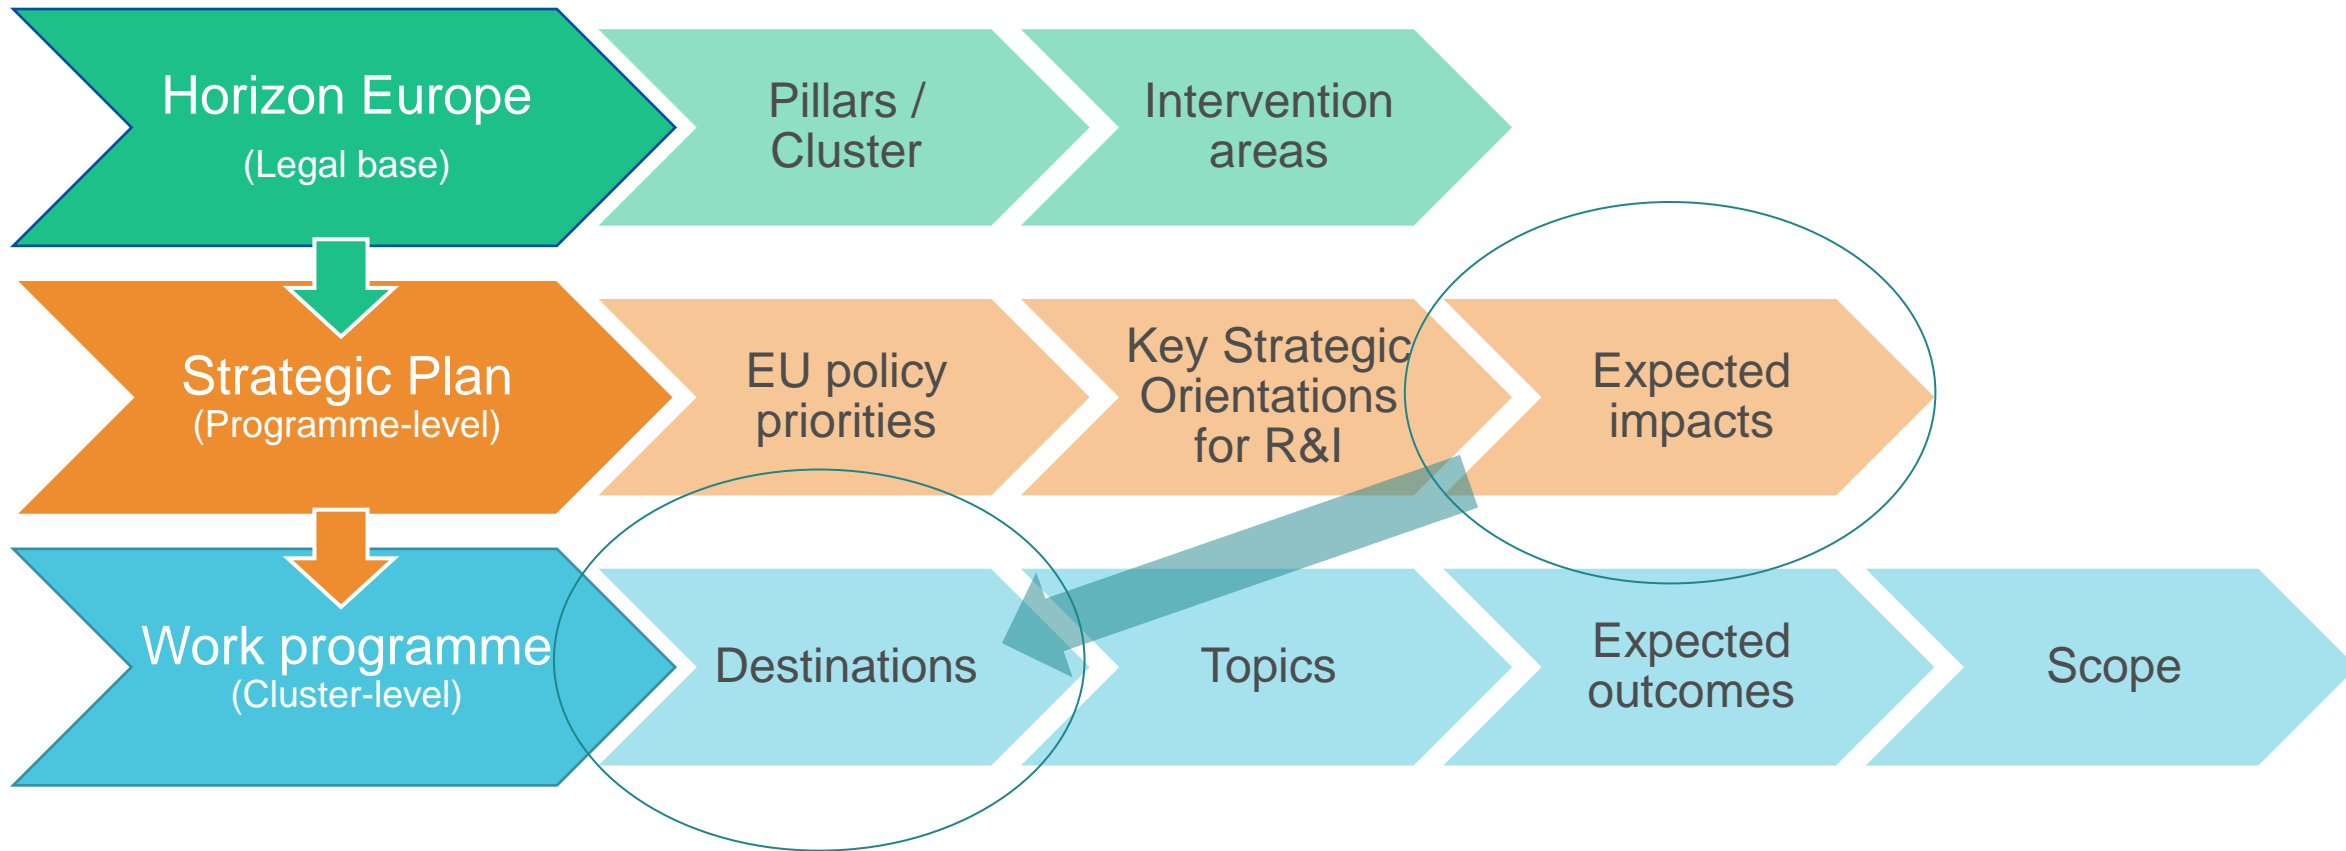

Impact 5: Balanced development of rural, coastal and urban areas

Impact 6: Innovative governance models enabling sustainability, environmental observation

Horizon Europe: intervention logic

Expected impacts shape the WP destinations

Strategic Plan 2021-2024

Work Programmes 2021-2022 & 2023-2024

Impact 1 Climate neutrality and adaptation to climate change

- Destination 5: Land, oceans and water for climate action

Impact 2 Preservation and restoration of biodiversity and ecosystems

- Destination 1: Biodiversity and ecosystem services

Impact 3 Sustainable and circular management of natural resources; tackling pollution; bioeconomy

- Destination 3: Circular economy and bioeconomy sectors
- Destination 4: Clean environment and zero pollution

Impact 4 Food and nutrition security for all from sustainable food systems from farm to fork

- Destination 2: Fair, healthy and environmentally-friendly food systems from primary production to consumption

Impact 5: Balanced development of rural, coastal and urban areas

- Destination 6: Resilient, inclusive, healthy and green rural, coastal and urban communities

Impact 6: Innovative governance models enabling sustainability, environmental observation

- Destination 7: Innovative governance, environmental observations and digital solutions in support of the Green Deal

MAA – eligibility and excellence

- Introduction to Cluster 6 WP21-22: [wp-9-food-bioeconomy-natural-resources-agriculture-and-environment_horizon-2021-2022_en.pdf \(europa.eu\)](#), page 19-21 (pdf version in the table with specific conditions; in online version below the topic)
- The MAA = **eligibility criterion** as indicated in the topic table: « proposals must use the MAA »
- The MAA is an integral part of the topic text and is counted as **criterion for excellence**:
 - Clarity and pertinence of the project's **objectives** (→ focus on needs and opportunities of end-users of project results)
 - Soundness of the proposed **methodology**, including **open science practices**, sharing and management of research outputs and engagement of citizens, civil society and end users where appropriate (→ focus on working according to MAA and plenty of broad communication and dissemination, in particular to end-users of project results)

MAA – requirements

- ✓ Project objectives must be targeting the **needs** of and **opportunities** for **end-users**
- ✓ Project concept and composition of the consortium must reflect a **balanced choice of key relevant actors with complementary knowledge**, able to ensure broad implementation. All actors actively involved all over the whole course of the project as from the planning to the end phase.
- ✓ Cross-fertilisation during the project must integrate **tacit** and **practical knowledge**: this must be illustrated with a sufficient number of high-quality **knowledge exchange activities** all along the project.
- ✓ Multi-actor engagement process must be facilitated by the **most appropriate methods**.

MAA – requirements

- ✓ Consortium must demonstrate its **added value**: how does the project complement existing research and best practices?
- ✓ Results must be **practical, easily understandable** and feed into the most used dissemination channels for end-users.
- ✓ For EU wide communication: “**practice abstracts**” in the common EIP format.
- ✓ Involve as much as possible **local interactive innovation groups** (EIP-AGRI Operational Groups under the CAP).

Brainstorming on AKIS in Horizon Europe

- How to further promote effective AKIS through Horizon Europe?
 - How to further strengthen the MAA in Cluster 6?
 - Any other ideas?

Thank you
